RIGBY loses REMNICK on the ABOUT TURN !!

15th JULY 1943 OCTU.

No Action whatever will be taken by the crew until it is definitely ascertained that the enemy have discovered and are about to open one of the hatches.

When there is no doubt upon this point - - - the code word 'Scramble' will be transmitted three times.

When the enemy have discovered the secret entrance to the op room
-- All sets, valves etc will be carried into the
chamber farthest from the hatch which the enemy
appear to have discovered, all papers destroyed by
fire and the sets rendered unworkable.

P.S. Should the enemy retire from the
main entrance chamber, operating will be resumed.

When this action has been taken the crew will proceed to leave the D/O. The Det Condr will lead the party and will get out as quietly as poss followed by the two other operators.

It is probable that their eyesight will be bad at this stage — !

The OC Det. - - - will make every effort to kill the enemy.

If (however), the party is too large for him to tackle he will endeavour to escape capture and to make his way to join up with the nearest - -

- - BRITISH Troops. (Americans forbidden).
